REASONS FOR ALLOWANCE

Page 2

1. The following is an examiner's statement of reasons for allowance:

While it is known in the art to provide a reverse flow filter with an inlet for a liquid to be prepared containing the substances to be separated, with an outlet conducting the filtrate as prepared liquid to an associated liquid system, and with an outlet for reverse flow volumes charged with separated substances, a closing valve for closing and opening the outlet for the reverse flow volumes, a filter mechanism for separation of residual liquid from a mud-like mass which contains substances separated in the separating device, and an assembly for return of the residual liquid to the liquid system as prepared liquid, characterized in that a separating device is present for separating solids from reverse flow volume (see, for example, EP 0387828), and it is known in the art to provide a filter system with a spinning screen in the form of a drum screen with annular screen wall, a spray tube conducting the liquid to the drum screen, which spray tube, with respect to its opening, extends at least in approximation tangentially on the inside of the screen wall of the drum screen in order to generate a spin flow of the liquid on the screen wall (see, for example, FR 1206619), in the examiner's opinion, the prior art fails to teach or fairly suggest combining the known elements with a line to the outlet for the reverse flow volume, a housing enclosing the drum screen to receive liquid penetrating the screen wall, and an outlet positioned on the bottom of the drum screen for discharge of the substances separated, and in that the separating device is mounted upstream from the filter mechanism. The instant invention provides the advantages of a Art Unit: 1724

reverse flow filter system that is concentrates fouling substances of the reverse flow more rapidly in order to improve the potential degree of separation as a whole.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Fred Prince whose telephone number is (571) 272-1165. The examiner can normally be reached on Monday-Thursday, 6:30-4:00; alt. Fridays 6:30-3:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Duane Smith can be reached on (571) 272-1166. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
